Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Rabenau, et al.-5318583.

Rabenau discloses a lancet A having a sharp tip-11, a torsion spring 22,122 having a spring arm 128 and a mechanism coupled to the spring arm, wherein transformation of the spring arm from a de-energized state to an energized state is effected through manual activation of the mechanism-. Both 36 and 52 are manually actuated buttons which act to cock the lancet and then activate the lancet.

Election/Restrictions

Claims 26-37 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 02-27-2007.

Allowable Subject Matter

Claims 1-20 allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose or fairly suggest a lancet with a torsion spring

coupled thereto, where the spring has first and second concentric rings connected by a spring arm.

Many of the prior art devices have lancets with torsion springs, the springs having concentric coiled rings which are integrally connected together, but none of which are connected by a spring arm.
